Abstract (en)
[origin: US2021379427A1] A rescue system for safely rescuing, in the long term, a person from a wind turbine, comprises a container that can be opened and is closed in a gas-tight manner, and a rescue device configured for rescuing the person from the wind turbine, wherein the rescue device is stored inside the container, and the container is filled with a protective gas, as a result of which the rescue device remains suitable for rescuing the person in the long term.
