Abstract (en)
An adapter (1) for filling a tank of a motorhome with a liquid under pressure is described, comprising a first coupling portion (2) able to couple with an inlet mouth of the tank, a second coupling portion (3) able to couple with one end of a flexible tube, and a through hole (4) which passes through the adapter (1) from a first end (21) to a second end (31) of the adapter (1). The first coupling portion (2) develops starting from the first end (21) and the second coupling portion develops starting from the second end (31). The first coupling portion (2) is tapered towards the first end (21) and provides an external surface (6) with pressure relief grooves (5). (Fig.1).
