Abstract (en)
A housing (110) for a luminaire (100, 200, 300, 400), adapted to hold a printed circuit board (130, 230, 330) comprising a driver (233) and at least one LED (232), the housing comprising: a light exit window (111); a first mounting element (210) configured to allow the printed circuit board to be mounted thereon; and a second, different mounting element (112) on an inner side wall (115B) of the housing, configured to allow the printed circuit board to be mounted thereon, wherein the second mounting element is more proximate to the light exit window than the first mounting element, to thereby enable the printed circuit board to be mounted at different heights with respect to the light exit window.
