Abstract (en)
A hood (1) for the suction of cooking fumes, comprises:- a box-like body (2) having a frontal opening (3) for the suction of cooking fumes;- suction means associated with the box-like body (2) for conveying the cooking fumes through the frontal opening (3);- a panel (5) connected to the box-like body (2) and positioned to cover the frontal opening (3) so as to allow an air flow through the frontal opening (3);- opening/closing means (6) positioned between the panel (5) and the box-like body (2) to allow a rotation of the panel (5) with respect to the box-like body (2), the panel (5) being switchable between a closed configuration in which it precludes access inside the box-like body (2), and an open configuration in which the inside of the box-like body (2) is accessible by means of the frontal opening (3); the opening/closing means (6) comprising a support element (7) configured to keep the panel (5) raised in the open configuration; the support element (7) being arranged to push the panel (5) against the box-like body (2) when the panel (5) is in the closed configuration.
