Abstract (en)

[origin: WO2020165507A1] Shoe extending between a toe (1) and a heel (3) and comprising an upper (5) engaging with an outsole (7) by means of an insole (9) positioned between the upper (5) and the outsole (7), the insole (9) comprises a sole base (11) and a sole side (13), the sole base (11) comprising a surface (15), designated as the top surface, open to the upper (5) and an opposite surface (17), designated as the bottom surface, acting as a surface for attachment to the outsole (7). According to the invention, an orthogonal projection (P) of the bottom surface (17) of the sole base (11) has a radius of curvature (R) at every point, giving said orthogonal projection (P) a convex curvature (19).
