Abstract (en)

[origin: WO2020165049A1] The invention relates to a floor nozzle for a cleaning device (12) having a vacuuming function, which nozzle comprises a nozzle body (18), a first vacuum cleaning region (48) which is arranged on the nozzle body (18), at least one second vacuum cleaning region (62) for coarse dirt, which second vacuum cleaning region is arranged on the nozzle body (18) and which, in relation to a pushing direction (42) of the floor nozzle along a floor (30) to be cleaned, is located upstream of the first vacuum cleaning region (48), and a flow divider (64) which is arranged on the nozzle body (18) and which divides a suction flow (16) into at least one first partial flow (66), which is supplied to the first vacuum cleaning region (48), and into at least one second partial flow (68) which is supplied to the at least one second vacuum cleaning region (62). The invention also relates to a cleaning device having a vacuuming function and to a method for vacuum cleaning a floor region.
