Abstract (en)

[origin: WO2020164844A1] An apparatus (1) for grouping products and separating discrete batches, for packaging, which comprises a portioning device (10) which has: - a belt (13) which can slide between a plurality of movement and transmission rollers (14), the arrangement of the rollers (14) defining the transverse profile of the belt (13), - a plurality of partitions (15) which extend from the belt (13) at right angles thereto, outward from the transverse profile. The portioning device (10) comprises at least one curved section (16) which is curved substantially outward from the transverse profile of the belt (13), between two of the rollers (14).
