Abstract (en)
[origin: WO2020165038A1] The invention relates to a goods anti-theft device (100), which is designed to be attached to goods to be protected, more particularly textile products, wherein the goods anti-theft device (100) comprises a housing (102) and a locking mechanism (130) which has a needle (106), wherein the needle (106) can be moved between a locking position, in which it engages with the goods to be protected, and a release position, in which it allows the goods anti-theft device (100) to be released and removed from the goods to be protected, the needle (106) having a curved, preferably circular-arc-like shape and in the release position being accommodated in the housing (102).
