Abstract (en)

[origin: WO2020165438A1] A coil (1), which has a pipe (2) with a pipe wall (6) composed of an electrically conductive material, wherein the pipe (2) has an inductive section (7) in which a gap (4) in the pipe wall (6) is arranged, which gap (4) shapes the pipe wall (6) to form a spiral in the inductive section (7), and wherein the pipe (2) has two contact sections (8) in which the pipe wall (6) is shaped to form an electrical connection. Further aspects relate to a module having a plurality of coils, to a method for producing a coil, and to a method for producing a module.
