Abstract (en)

[origin: EP3925467A1] Provided are: a cartridge for an inhaler which has a novel structure; and an inhaler. A cartridge 20 for an inhaler is provided with a heater unit 17 configured to atomize a liquid to generate an aerosol. The cartridge 20 has: a proximal end 21 which is located close to the mouth of a user when the user is using an inhaler; and a distal end 23 on the opposite side from the proximal end 21. The heater unit 17 is provided with: a heater 32 having a first end part 33A and a second end part 33B; a first electrode 30A to which the first end part 33A is connected; and a second electrode 30B to which the second end part 33B is connected. At least one of the first electrode 30A and the second electrode 30B has: a first part to which one of the first end part 33A and the second end part 33B is connected; and a second part extending from the end part on the proximal end side of the first part towards the proximal end.
