Abstract (en)  
Machine (1) for spreading fabric comprising:- a spreading surface (2);- a carriage (3) that is movable on the spreading surface (2) with forward-backward motion for spreading a pile of fabric on the spreading surface (2) along a spreading direction (4) parallel to the spreading surface (2);- a command-and-control electronic control unit (100) of the machine (1);- an interface (200) for an operator comprising a digital screen (201) with rectangular shape comprising two long sides (202, 202') and two short sides (203, 203'), wherein the electronic control unit (100) is connected to the digital screen (201) and it is programmed for displaying onto the digital screen (201) an image (400) representative of the pile of fabric; wherein a projection of each of the long sides (202, 202') on the spreading surface (2) forms with the spreading direction (4) a first acute angle (302) greater than or equal to - 20° and less than or equal to 20°.
