Abstract (en)
[origin: WO2020170128A1] The swiveling brush (1) for the application of fluid products, particularly for powdery, creamy, liquid products or the like, comprises: a gripping portion (2) intended to be grasped by a hand (3) of a user (4) for the movement of the brush (1); and an housing seat (8) formed on the gripping portion (2) and intended to house an application body (9) comprising, in turn, a plurality of spreading elements (10) which are adapted to take and apply a fluid product on a work surface (S); Wherein the application body (9) is associated with the housing seat (8) by interposition of coupling means (11, 12) configured to allow the rotation of the application body (9) with respect to the gripping portion (2).
