Abstract (en)

[origin: WO2020169516A1] The invention relates to a dishwashing system (110) for cleaning articles (112) to be cleaned comprising at least one cavity (114). The dishwashing system (110) comprises: - at least one dishwasher (116), said dishwasher (116) comprising at least one cleaning chamber (124) for receiving articles (112) to be cleaned and additionally at least one supply device (130) for supplying at least one cleaning fluid to the articles (112) to be cleaned, wherein the dishwasher (116) additionally has at least one pressure application device (141) for supplying compressed gas to the articles (112) to be cleaned; and - at least one dishwasher basket (118) which can be introduced into the cleaning chamber (124) and comprises at least one basket base (140) and a plurality of nozzles (139) extending from the basket base (140). The supply device (130) is designed to supply the cleaning fluid to the cavity (114) of the articles (112) to be cleaned placed on the nozzles (139) by means of the nozzles (139) in at least one cleaning step. The dishwasher (116) is additionally designed to supply compressed gas to the cavity (114) of the articles (112) to be cleaned placed on the nozzles (139) by means of the nozzles (139) in at least one drying step.
