Abstract (en)
[origin: WO2020169139A1] The invention relates to a clutch assembly (10) for a drive train of a motor vehicle, wherein the clutch assembly (10) comprises a housing (12) which delimits a wet chamber, a carrier body (14) mounted such that it can rotate relative to the housing (12) about an axis of rotation (D), an input shaft (16) mounted such that it can rotate relative to the housing (2) about the axis of rotation (D), a first clutch (18), a second clutch (24) and a third clutch (30). The clutch assembly (10) also comprises, integrated in the rotor (36) thereof, a first pressure oil inlet (39a), a second pressure oil inlet (41a), a third pressure oil inlet (43a) and a cooling oil inlet (50) in order to supply the three clutches (18, 24, 30) with pressure oil and cooling oil. This configuration of the clutch assembly (10) allows for a compact structure.
