Abstract (en)

[origin: WO2020169598A1] The invention relates to a radar sensor for factory automation and logistics automation, comprising a radar circuit assembly, which has a radar chip for generating, emitting and evaluating radar measurement signals with an opening angle of less than 5°. The radar chip has a cross-sectional area of less than 1 cm<sup>2</sup> and generates radar measurement signals having a frequency of over 200 GHz.
