Abstract (en)

The invention relates to a bag closure applying unit for attaching a bag closure, in particular a "Kwik Lok" type and/or "Schutte" type of bag closure, to a bag, wherein the bag closure applying unit comprises: an elongated housing having a first end and a second end, opposite to the first end, and a guiding channel extending between the first end and the second end, wherein the guiding channel is configured for receiving a strip of bag closures; and a moving mechanism configured for engaging the strip of bag closures and for moving the strip of bag closures through the guiding channel, wherein the moving mechanism comprises two engaging arms for engaging the strip of bag closures, wherein the engaging arms are configured to engage the strip of bag closures at the longitudinal sides thereof.
