Abstract (en)

[origin: EP3929143A1] Mechanical winch (10) with improved safety of the control mechanism, wherein a lever system of the mechanism is hidden inside a rigid protective housing (10a), which is attached to the winch or preferably made as an integral part of the winch housing, while a part of the rope (12) and an optional handle (12a) for activation of pulling and a part of the rope (13) and a handle (13a) for releasing the brake are not inside the said protective housing wherein the ropes are led to the exterior through an opening (10b) in the protective housing. The said opening, which may have any shape, can be on any side of the protective housing.
