Abstract (en)
[origin: EP3929368A1] A self-supporting wood panel system for a building comprising a plurality of self-supporting wall panels (10) of engineered wood and adapted to support the building and, at least one self-supporting transverse panel (30) of engineered wood, and a method of assembling a wood building of a wood panel system. The panel system comprises a plurality of wall panels (10) and the at least one transverse panel (30) adapted to rest upon at least two wall panels (10) forming a roof and/or floor of the building. The plurality of wall panels (10) are connectable at their side surfaces (12) to the at least one transverse panel (30) by a plurality of dovetail joints (20).
