Abstract (en)
[origin: WO2020173791A1] The invention relates to a vacuum apparatus comprising: - a suction unit (50) for producing a suction flow, the suction unit (50) comprising a fan (60), which has a fan motor (62); - a fan holder (72) for holding the fan (60) and/or the fan motor (62); and - a guiding device (70) for process air, the guiding device (70) for process air comprising a channel piece (80) which has at least one channel (82) which is connected, on the exhaust air side, to the fan (60), the channel piece (80) sitting on the fan holder (72), and the channel piece (80) sitting on the fan (60) or the fan motor (62).
