Abstract (en)

[origin: WO2020174080A1] The invention relates to a laboratory-process support device (2). The laboratory-process support device (2) comprises a handling system (3) and a central control unit (5). The handling system (3) is configured to serve a laboratory installation (4, 4a-4g). The handling system (3) is furthermore configured to handle a reactant (12), an intermediate, a product (13) and/or a reactor for a chemical process of the laboratory process. The central control unit (5) is configured to plan a laboratory process and to appropriately control the handling system (3).
