Abstract (en)

[origin: WO2020173682A1] The method has the steps of supplying data (D) on at least two channels; generating information (I1... In) from the data (D) in the at least two channels; generating a verification key (S1... Sn) from the information (I) in the at least two channels; supplying the information (I1... In) and the verification key (S1... Sn) of the two channels to a verification device (30); and using the information in a defined manner on the basis of a comparison of the verification key (S1... Sn).
