Abstract (en)  
[origin: WO2020175981A1] A cycle (1) is provided which comprises a first cycle portion (17) and a second cycle portion(19), and a steering assembly(35), comprising a steering handle (11) in the first cycle portion (17) and a steerable wheel (5) in the second cycle portion (19) operably connected together for steering the cycle (1). The first and second cycle portions (17, 19) are adjustably coupled for reversibly transforming the cycle (1) from a first, relatively long, configuration to a second, relatively short, configuration with respect to a length direction (L). The first cycle portion (17) comprises a first steering portion of the steering assembly and the second cycle portion (19) comprises a second steering portion of the steering assembly.
