Abstract (en)
[origin: WO2020225028A1] The invention relates to an electric motor (2) having a stator(3) and a rotor (4). The rotor (4) is fitted with permanent magnets (7) which are surrounded by a rotor packet (8). A heat dissipating element (14) is attached to the rotor packet (8). A gap seal (16) is formed between an outer diameter of the heat dissipating element (14) and an inner diameter of a component (6) connected to the stator (3).
