Abstract (en)  
[origin: WO2020173920A1] In accordance with some embodiments, an apparatus comprises at least one processor and at least one memory including computer program code. The at least one memory and the computer program code are configured to, with the at least one processor, cause the apparatus to receive at least one user plane setup configuration message comprising at least one multi-path client key. The apparatus further transmits at least one user plane setup configuration message comprising at least one multi-path client key.
