Abstract (en)
A heating cooker according to the present disclosure includes: a housing including a pair of left and right side walls, an upper wall, a lower wall, and a back wall to have a heating chamber; a support wall including a first wall part joined to and supporting one of the left and right side walls from below, a second wall part downwardly recessed on an inner side of the first wall part in a plan view and receiving the lower wall, and a bottom wall downwardly recessed on an inner side of the second wall part in a plan view; and an adhesive part joining a peripheral border of the lower wall and the support wall together. The adhesive part includes a first area extending from the peripheral border of the lower wall to a left gap between the left side wall and the first wall part and a second area extending from the peripheral border of the lower wall to a right gap between the right side wall and the first wall part.
