Abstract (en)
The present invention relates to a household appliance (1) comprising a body (2); a rear wall (3) which covers the rear region of the body (2); and a connection member (4) which enables the rear wall (3) to be fixed to the body (2), wherein the household appliance further comprises at least one skirt (5) in the form of an extension which extends from the corners where the body (2) joins the rear wall (3) towards the rear wall (3), and at least one housing (6) which is provided at the corners of the rear wall (3) and which engages with the skirt (5) to ensure fixing.
