Abstract (en)

[origin: WO2020177915A1] The invention relates to a method for processing at least two starting materials that are processed to one product. According to said method, a predetermined moisture interval for the processing method is provided for each starting material, a. every moisture interval is subdivided into two or more moisture classes, b. a moisture content is measured for each starting material prior to processing, c. the measured starting material and its moisture content is allocated to one of the moisture classes and d. the starting materials are processed in the process according to their moisture classes.
