Abstract (en)
[origin: WO2020181708A1] A toilet lid capable of being connected to a toilet seat, wherein the toilet lid comprises: a light-permeable layer (210) having an upper surface (211) and a lower surface (212) with a shape and size associated with the toilet lid, wherein at least a portion of the light-permeable layer is at least partially permeable to light; a light emitting means (260), wherein the light emitting means (260) is positioned such that it is capable of emitting light in the direction substantially parallel to the upper surface (211) and the lower surface (212) of the light-permeable layer (210) and illuminating at least part of the light-permeable layer (210).
