Abstract (en)
[origin: WO2020178127A1] The invention relates to a marking profile for identifying electrical installations, comprising a marking region (4) which has a cover surface (6) to be labelled, comprising a support region (8) which adjoins the marking region (4) on the opposite side of the cover surface (6), comprising at least one shaped element (10) for interlockingly securing to a receiving section, wherein the marking profile (2) has an extruded plastic profile (2) or consists of an extruded plastic profile (2), and wherein the plastic profile (2) has a constant cross-section when viewed along its longitudinal extension.
