Abstract (en)

[origin: WO2019118996A1] The invention relates to a refill for a dispenser (1), comprising a material web which is wound into a roll (10) and at least one bearing journal (12) which is substantially axially movable. The at least one substantially axially movable bearing journal (12) can be moved outwards in a substantially axial direction away from the roll (10) starting from a defined inner final position (I), in which the bearing journal protrudes axially beyond the roll (10). The invention additionally relates to a bearing unit for such a refill and to a dispenser for receiving the refill and discharging the material web (15).
