Abstract (en)
The present invention relates to a cartridge cap mountable on a distal end of a cartridge body for use with an extrusion gun. The cap comprises a dispensing outlet extending in a longitudinal direction around a longitudinal axis of the outlet. The cap further comprises a cap body extending radially outward from said outlet. Moreover, a plurality of rods extend in the longitudinal direction from an inner surface of the cap body. At least one rod of the plurality of rods is adapted to pierce a flexible bag when the flexible bag is pressed against the at least one rod. Furthermore, the tips of at least two of the plurality of rods have different sharpness. The present invention further relates to a cartridge assembly comprising such a cartridge cap.
