Abstract (en)

The present invention relates to a box-shaped insert element (10) for insertion into a box-shaped container (C) for accommodating consumer goods, like tobacco articles, the container (C) having an inner as well as an outer surface and an opening area (O) for removing the consumer goods, wherein the box-shaped insert element (10) is adapted to be placed in the opening area (O) of the container, and wherein the box-shaped insert element (10) comprises:- an access opening (22) through which the consumer goods can be removed from the container (C) and which is covered by a resealable closing element (24); and- at least one attachment portion (29a, 29b) for attaching the insert element (10) to an inner surface of the container (C), wherein the insert element (C) is made of a material comprising at least one rigid layer, and wherein the extension of the insert element (10) in a height direction (H) is at least substantially smaller than the extension of the container (C) in the height direction (H).
