Abstract (en)
[origin: EP3936677A1] The present invention provides a precast modular wall system (10) comprising an inner leaf (12) and an outer leaf (14) secured in spaced relationship such as to define a cavity therebetween, and an exterior skin (18) secured to the outer leaf (14) by a plurality of brackets 20, 120) operable to permit limited planar displacement of the exterior skin relative to the outer leaf, and which are thus arranged to reduce on site construction time and complexity.
