Abstract (en)

[origin: WO2020181370A1] A display, securing and transporting device can be used with many types of footwear, including boots, dress shoes, sandals, cleats, high heeled shoes and casual shoes. The device comprises a first elastic body adapted to retainingly and releasably engage a perimeter of a first one of a pair of footwear. The first elastic body defines a toe receiving portion and a heel receiving portion; and a lateral band connects the toe receiving portion and the heel receiving portion. A second elastic body is adapted to retaining and releasably engage a perimeter of a second one of a pair of footwear. The first elastic body and the second elastic body are coaligned and attached to one another at their respective lateral bands. A mounting means is provided on the device to receive a hanger.
