Abstract (en)

[origin: WO2020181379A1] The invention relates to an intervention tool (2) that is movable and designed to reposition an anode assembly (38) of an electrolytic cell (3). The intervention tool (2) comprises a frame (22) provided with one or more bearing surfaces (220) allowing the intervention tool (2) to bear against and to be stably supported directly on at least one element of the electrolytic cell (3) and an intervention unit designed to reposition the anode assembly (38).
