Abstract (en)
[origin: EP3709307A1] There is provided a system (100) for storing audio and/or visual content of a user. The system (100) comprises one or more processors (102) configured to, in response to a detection of a gesture and/or voice command of a user, identify a location on a body of a subject indicated by the gesture and/or voice command. The system (100) also comprises one or more processors (102) configured to control at least one memory (104) to store an indication of the identified location on the body of the subject with audio and/or visual content of the user captured for a time period after or during which the gesture and/or voice command of the user is detected.
