Abstract (en)

[origin: WO2020183080A1] The invention relates to a method for managing the download of images (S16,S32,S48) associated with image jumps which are capable of being carried out during accelerated reading of content (VDO). The content can be downloaded from a communications network. The invention is characterised in that at least one image which is associated with a jump is downloaded in advance.
