Abstract (en)
[origin: EP3939457A1] A magnetic fastener system including a first component having a first support strip and a plurality of first magnetic coupling components coupled to the first support strip and spaced along a length thereof. Each first magnetic coupling component includes a backing member made of a nonmagnetic, magnetizable material, and a magnet magnetically coupled to an associated backing member. The system further includes a second component having a second support strip and a plurality of second magnetic coupling components coupled to the second support strip and spaced along a length thereof. Each second magnetic coupling component is at least one of a magnet or a magnetizable material. The second magnetic coupling components are configured to be magnetically attracted to the first magnetic coupling components.
