Abstract (en)

There is described a label preparation machine (6) for preparing decorated single label sheets (2) . The label preparation machine (6) comprises a conveying device (12) configured to (continuously) advance a web (13) of labeling material along a web advancement path (Q) and a light emitting unit (14) configured to decorate the, in use, advancing web (13) of labeling material and to cut single label sheets (2) from the, in use, advancing web (13) of labeling material at a decoration and cutting station (15).
