Abstract (en)

[origin: WO2020187646A1] The invention relates to an applicator system (60) for a hair treatment device, comprising: - a reservoir (40) containing a cosmetic product, - an applicator (20) comprising an application member (26) made of a porous material, the applicator (20) being arranged to be removably attached to the reservoir (40) so that the application member (26) comes into contact with the cosmetic product contained in the reservoir (40) and is refilled with cosmetic product, the applicator (20) being configured to be removably attached, after separation from the reservoir (40), to a corresponding receiving zone of the hair treatment device, the amount of cosmetic product initially contained in the reservoir (40) being greater than the amount of cosmetic product transferred to the application member (26) during the refilling of the latter by the reservoir (40).
