Abstract (en)
[origin: WO2020187727A1] The present invention relates to a method for dyeing keratinous material, in particular human hair, comprising the following steps: - applying an agent (a) to the keratinous material, said agent (a) containing an organic silicon compound and - applying an agent (b) to the keratinous material, said agent (b) containing: (b1) at least one chromophoric compound comprising at least one pigment based on a lenticular substrate plate, and (b2) at least one film-forming polymer. The invention also relates to a multi-component packaging unit which contains the two agents (a) and (b) in two separately fabricated containers.
