Abstract (en)

[origin: WO2020187654A1] The invention relates to a method for starting off a motor vehicle, the motor vehicle having a drive train (9), which comprises: a hybrid drive unit, a transmission and an accelerator pedal, by means of which a driver can set a driver's desired torque (1), wherein during the starting off of the motor vehicle the hybrid drive unit is controlled to a total drive torque (2) greater than the driver's desired torque (1) in a first operating phase (A).
