Abstract (en)

[origin: WO2020192843A2] The invention relates to a method for operating a treatment system, by means of which an optimized workpiece treatment is facilitated. The method for operating a treatment system has the following steps: guiding workpieces through a treatment basin filled with a treatment medium in order to treat the workpieces; rinsing the workpieces with a rinsing medium while and/or after the workpieces are guided out of the treatment basin; and producing the rinsing medium from the treatment medium, wherein the rinsing medium is produced by means of a preparation device by filtering, in particular nano-filtering, the treatment medium.
