Abstract (en)
[origin: WO2020187480A1] The invention relates to a woven fabric in which warp threads and weft threads are woven together to form a textile structure, the woven fabric having a thickness direction and a warp direction and a weft direction, and the warp threads and/or the weft threads having an undulating course in the thickness direction, characterised in that at least some, preferably all the weft threads have an undulating course in the warp direction and/or at least some, preferably all the warp threads have an undulating course in the weft direction. The invention also relates to a technical textile comprising such a woven fabric.
