Abstract (en)

[origin: WO2020187360A1] The invention relates to a door presenting device (1) for a motor vehicle door element (13) having an electric drive unit (2) and an actuating means (6), wherein the actuating means (6) can be adjusted by means of the drive unit (2) and a gear mechanism (3) arranged between the actuating means (6) and the drive unit (2), with the result that a movement of the door element (13) can be enabled, and further having a locking means (8). The door element (13) can be maintained in position by means of the locking means (8) and the locking means (8) can be electrically actuated, namely indirectly, preferably manually, actuated.
