Abstract (en)
[origin: WO2020188050A1] The invention relates to an angle detection device, in particular for a fuel fill level detection device, comprising: a support (10), a potting compound (20) which is arranged on the support (10) in a bonded manner, a sensor (40; 41) for contactlessly detecting the orientation of a magnetic field of a magnet (100) which is at least partly arranged in the potting compound (20), in particular on the support (10), and at least one conductor track (60-62) which is arranged flatly on the support (10), in particular in a bonded manner.
