Abstract (en)

[origin: WO2020188227A1] The invention relates to the detection of a position change of a radio receiver, characterized by: - said receiver acquiring (P1) a radio signal at a given time, - determining (P2) a set of at least one radio transmitter from the radio signal, - comparing (P3) said set of at least one radio transmitter with at least two sets of previously recorded radio transmitters, - determining (P4) whether the radio receiver has changed position on the basis of said comparison.
