Abstract (en)
[origin: WO2020201563A1] The present invention relates to a system arrangement for the automated establishment of an error-free, deterministic and three-dimensional building plan. The present invention also relates to a correspondingly configured method and to a computer program product with control commands that implement the method and/or operate the system arrangement. According to the invention, it is thus possible to establish three-dimensional building plans starting from two-dimensional building plans while taking into account a complex set of rules.
