Abstract (en)  
The present invention relates to a serial hybrid motorcycle provided with an efficient layout of component parts comprising an electric power control unit. An electric power control unit (26) that electrically drives an in-wheel motor (M) to rotate a rear wheel (18r), by controlling electric power from a battery (B), is disposed between an electric power generating engine (E) that charges the battery (B) and a pivot plate (34) that axially supports a swing arm (36).
