Abstract (en)
[origin: WO2020193092A1] A retraction or ejection device (4), in particular for a movable furniture part, comprises a housing (5) on which there is formed at least one guide track for a movable driver (7) which is preloaded by an energy store (8), wherein the at least one guide track has a linear portion (11, 55, 56) and an angled park portion (14, 15) on which the driver (7) can be locked when the energy store (8) is tensioned, wherein the linear portion (11, 55, 56) of the guide track is formed from at least two parts which are adjustable relative to one another for setting the length of the linear portion (11, 55, 56) of the guide track.
